

STONY PLAIN SUN

VOLUME SEVEN.

STONY PLAIN, ALBERTA THURSDAY, APRIL 28, 1927

Whole Number 351

Protect Our Game Birds.

In view of the return of our feathered friends from the South that have returned to live with us for the Summer and raise their young, it is well to remember that there is a law to protect them and their eggs.

Section 13 of the Game Act says that no person shall (except where otherwise provided for) at any time wilfully disturb, destroy or take the eggs of any game or other birds protected by the Act.

Section 21 of The Game Act tells what birds may be killed (which also means that their eggs may be taken or their nests broken up). These are Crows, Eagles, Goshawks, Pigeon Hawks, Duck Hawks, Cooper's Hawks, Hawk Owls, Blackbirds, Crackles, English Sparrows, Loons, Cormorants, Pelicans, Magpies.

The penalty for disturbing the eggs or killing any bird whatsoever (except those above mentioned) is not less than ten dollars nor more than fifty dollars, with costs.

LOCAL NEWS.

Miss Annie McKinlay, who has been teaching a school at Red Willow, is in an Edmonton hospital at present, undergoing treatment for an dislocated knee-cap.

Mrs. H. J. Boettcher was taken to an Edmonton hospital on Friday, for treatment.

Mr. and Mrs. Nick Kowalchuk and family, of Edson, are visiting this week with Mr. and Mrs. M. Gamble, at Glory Hills.

Mr. Walter Rosenau, who has been attending Concordia college, River Forest, Illinois, arrived in Stony on Sunday morning, and has taken charge of St. Matthew School No. 1.

Mr. R. A. Patrick, after visiting friends at Millet, has returned to his farm, and is making preparations to visit his brother in Idaho.

Const. Davis of Evansburg was a week-end visitor at the local Police detachment.

Mr. and Mrs. J. A. Barrie and Master Bobbie have taken up their residence at the Beach for the season.

The dance held Friday by the Ride Club was a very successful affair, a large crowd being present. The Harmony Kings put over some good dance music.

At the recent closing exercises of the Technical school, Edmonton, Miss Elsie Heichen of Stony Plain, was awarded a diploma on the completion of her three-year-course in vocational designing.

Master Jackie Miller is recovering this week, from the shooting accident of which he was the victim, on April 20. He and a boy companion were out for rifle practice, when his companion's firearm was inadvertently discharged, the bullet lodging in the calf of Jackie's left leg. The accident occurred just west of the Fair grounds.

Owing to the inability of the Judge and his Court staff to get to Stony last week, as a result of the poor condition of the roads, the session of the District Court was declared off for the present. There is the prospect of a session being held here early in June. In the meantime, the cases which had been set for a hearing here will probably come up before a Judge in an Edmonton court.

There has come to the Editor's desk this week, a beautiful specimen of the art preservative of arts in the National number of the Montreal Herald. The volume contains a number of interesting articles on the industries of the Maritime Provinces, and is profusely illustrated. The new coat-of-arms of the Dominion appear on the front cover in charming colors. The outside back cover has on it the "animated map of Nova Scotia," which is quite unique and must be seen to be appreciated.

On To The North!

The development of Canada is entering, in fact, has already entered a new phase and one which holds promise of adding enormously to the population, wealth, and economic strength of the Dominion. In all the provinces, with the exception of the Maritimes, the attention of governments and people are turned northwards.

The history of Canadian growth during the first half century of Confederation records development upon east and west lines, beginning with the acquisition by the newly-born Dominion of the Hudson's Bay Co. lands of the west and the building of the Canadian Pacific Railway; then came the construction of the Canadian Northern; and finally the projection of the National Transcontinental and Grand Trunk Pacific across the continent. Practically all traffic moved east and west, and in these western provinces a long roundabout journey was frequently necessary in order to travel from one place to another only a comparatively short distance apart on a north and south line.

As a result of this early and quite natural programme of development, Canada became as a country, so far as settlement and trade was concerned, a narrow strip stretching all the way from the Atlantic to the Pacific, but consisting of fewer people than are to be found in European countries which in area are smaller than Canadian provinces. Canada had length but it lacked depth, a condition which made for weakness as a nation, and because of the great distances separating the people and leading to a too great diversity of interests, a lack of knowledge of the needs and problems of the different sections—Maritimes, Ontario and Quebec, the Prairie West, the Pacific slope—a resultant sectional rather than a national viewpoint. Always there existed the possibility of this thin thread snapping at some point.

It is, therefore, a matter of national satisfaction that Canada is now on the threshold of its second great development—a development northwards, which will give the Dominion what it has hitherto lacked, depth as well as length. From all quarters, governmental, financial, manufacturing, comes the confident prediction that the next two or three decades will witness a complete transformation in this respect, and hardly a week passes that some new enterprise involving northern development is not reported.

Development works, financed by Canadian, British and United States capital and involving the investment of close upon one billion dollars, are under way in Quebec which will result in the establishment of great industrial plants, the employment of tens of thousands of men, the creation of new cities and towns, and an enormous expansion in the trade of the Dominion. These are practically all to the north of present settled areas.

In Ontario, the Provincial Government has decided to push construction of its railway through to James Bay, while throughout both old and new mining areas of Northern Ontario unprecedented activity in prospecting and development is in progress.

Manitoba has awakened to the possibilities of its vast northern territory and, as in Ontario and Quebec, the eyes and energies of the people are being focussed on mineral and water-power development there with all that this must mean in industrial expansion. The business men of Winnipeg realize they can no longer depend for future growth upon being simply a wholesale and distribution centre for the west.

The age-old demand of the Prairie West for an outlet on Hudson Bay is at last being met by aggressive action and the last section to be built, within barely a month, be completed. The latest discoveries in science and invention are being employed to expedite this work. Airplanes have for weeks been carrying men and supplies from the end of steel to Churchill, other airplanes will patrol the Hudson Straits, airplanes are being employed in survey work in northern Saskatchewan, as well as in northern Ontario. Important branch lines of railway are to be built in northern Saskatchewan to connect existing railways with the road to the Bay, while the Saskatchewan Government has appointed a commission to make expert inquiry into the whole subject of power development within the Province.

Alberta has pushed railways well into the north of that Province, and it is now known there exists a wealth of oil, mineral and other resources in those northern stretches, as well as vast tracts of fertile lands suitable for agriculture. Investigation is now to be made of the most suitable route for a railway from northern Alberta through British Columbia to the Pacific coast.

VERY HARD LARGE DIMPLES

Spread Over Face and Hands, Cuticura Heals.

"My trouble began with a few pimples on my face, and soon spread all over them. The pimples were very hard, large and red, and caused much trouble. They itched and burned so that I scratched them, which caused eruptions. My face was disfigured, and I could not put my hands in water and could hardly do my work."

"A friend advised me to try Cuticura Soap and Ointment so I purchased some, and in about two months I was completely healed."

(Signed) Miss Jennie Durbane, 441 Giroux St., Norwood, Mass.

Cuticura Soap, Ointment and Talcum are all you need for every-day toilet and nursery purposes.

A Confederation Prize For Literature

Recognition For the Most Outstanding Book of the Year

A Confederation Prize for Literature, to be awarded annually to the author of the most outstanding Canadian Book of the year, has been suggested by the Canadian Authors' Association in connection with the celebration of Canada's sixtieth birthday.

The National Executive of the Authors' Association by a unanimous vote has memorialized the Prime Minister, suggesting the setting aside of one-tenth of the \$250,000 Diamond Jubilee Fund to endow in perpetuity such an annual prize for the encouragement of Canadian Literature.

Husbands Desert Wives

Pitiable Suffering Caused in Many Cases by These Desertions

The Montreal Star says editorially: "Pitiable suffering is caused by the tragedy of husbands deserting their wives and children. There has been a marked increase of this cruel conduct for some years past. Statistics compiled from court records, in our own city, demonstrate the sorrowful fact that fully 25 per cent. of the children placed in institutions of all kinds, and who are practically supported on charity, are 'innocents' who have been deserted by their fathers. And, think of it, in 24 per cent. of these desertion cases the mother was left all alone. Here we have brutal cruelty on the part of husband and father."

A VERY RELIABLE HOME TREATMENT

How Weak, Run-Down People Can Obtain Relief

Among the many remedies offered for the maintenance or restoration of health and strength, there is none so complete as Dr. Williams' Pink Pills. Most ailments are due to poor, thin blood. Dr. Williams' Pink Pills have a specific action on the blood, making it rich, red and pure. Through this richer blood the tissues of the body are better nourished, and the functions of the body better performed. Anemic sufferers, weak, languid and nervous people speedily find new health and strength through the use of this medicine. This is the experience of Mrs. John Armour, South Monaghan, Ont., who says:—"I am one of the many thousands who have regained health through the use of Dr. Williams' Pink Pills, and I take this opportunity to say, in word in praise of this splendid medicine. Before beginning the use of this medicine I was doing badly. I was thin, I found it difficult to do my housework and was tired and breathless at the least exertion. I tried several medicines without benefit, and finally decided to try Dr. Williams' Pink Pills. I took them for a few days, sleep better, and eat better, and found my weight increasing. In a week I felt like a new person. I have since recommended the pills to others who have taken them with equally good results."

Try Dr. Williams' Pink Pills for anæmia, rheumatism, neuritis, nervousness. Take them as a tonic if you are not in the best physical condition and cultivate a resistance that will keep you well and strong. Get a box from the nearest drug store and begin this treatment now. The pills are sold by all medicine dealers or will be sent by mail at \$2 a box by writing The Dr. Williams' Medicine Co., Brockville, Ont.

The Swiss Industries Fair, the origin of which dates back to the middle Ages, will be held at Basel this year, April 2 to 12.

Strangled with Asthma is the only explanation that seems to convey what is endured from an attack of this trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is beyond measure. Where all was suffering there comes comfort and rest, breathing becomes normal and the bronchial tubes completely cleared. This unequalled remedy is now many times its price to all who use it.

Primitive Russians place a certain ease of character in the hands of deaf persons, to be given to Saint Peter at the gates of Heaven.

Ready-made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable; for scalds, burns, bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than its use, and that will satisfy anyone as to its effectiveness.

More mineral discoveries of importance have lately been made in the Portland canal area, Prince Rupert district.

An Oil of Merit.—Dr. Thomas' Electric Oil is not a jumble of medicinal substances thrown together and pushed by advertising, but the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination of it and kept public favor from the first. A trial of it will carry conviction to any who doubt its power to repair and heal.

A feature of the Edmonton Exhibition this year will be another historical pageant, commemorating the diamond jubilee of the Dominion.

For distemper—Minard's Liniment.

SUNDAY SCHOOL LESSON

MAY 1

PETER'S DENIAL AND REPENTANCE

Golden Text: Let him that thinks he stands, take heed lest he fall.—1 Cor. 10:12.

Lesson: Mark 14:53; 51, 66-71; Luke 22:61, 62.

Devotional Reading: Psalm 51:1-5.

Explanations and Comments

1. In the Palace of the High Priest, Mark 14:53, 54:—The time is after the betrayal and arrest in the Garden of Gethsemane. Two painful scenes are being enacted in the palace of the high priest. Above, in the Assembly Hall, stands Jesus before the Sanhedrin (chief priests and elders and scribes), the Judge of the World is being judged by men observed by hatred, bent on delivering him up to death.

Below, in the courtyard sits Peter. He had followed Jesus afar off, and had entered "even within, into the court of the high priest," Mark tells us. The exposure is redundant, and "suggests the idea of one stealthily feeling his way into the court of the palace, venturing farther and farther in, and gaining courage."

The courtyard was the inner quadrangle, around which the palace was built. With the officers (doubtless the military guard who had delivered up their prisoner and were waiting for further orders), Peter was warning himself by the fire which glowed in an open charcoal brazier. In the spring the nights are cold at Jerusalem and a fire is welcome.

"Silent, and apprehensive at a word," Peter, the bold disciple of his Lord, crouches above the brazier's shoulder flame.

Flinching to hear his too familiar name, flinching with Christ's defiant to voice, he should fiercely whisper, "Caveat!"

The tongue, abrupt to censure or confess, is stifled by occasions harsh dis-crepancy.

The steady eye that flamed in love or hate, shifted from wide eye to eye of them that wait.

O Peter! Canst thou thus so soon forget?

The grace on Hermon's Mount that hallowed thee,

While yet the stars upon his cheeks were wet,

From Bethany and grim Gethsemane—Ereced Lindsay

Figins.

The indications of worn are restlessness, grinding of the teeth, pinching of the nose, extreme perspiration, often convulsions. Under these conditions one of the best remedies that can be got is Miller's Worm Powders. They will attack the worms as soon as administered and they pass away in the evacuations. The little sufferer will be immediately eased and a return of the attack will not be likely.

At the glorious feast of knowledge some people never get any farther than the soup.

GUM-DIPPING Builds Extra Miles

THE Firestone process of Gum-Dipping is one of the most important of the many Firestone contributions to more economical highway transportation.

By this process, every fiber of every cord is thoroughly saturated and insulated with rubber, minimizing friction and heat so destructive to tire life.

On the cars of hundreds of thousands of motorists, in the day-in and day-out service of the largest truck, bus and taxi-cab fleets, in the battle of tires on race tracks, Firestone Gum-Dipped Tires, because of their greater stamina, are delivering longer mileage with added safety and comfort.

The Firestone dealer in your locality sells and services these extra quality tires. Let him tell you of the trouble-free service that the Gum-Dipping process insures, and how he can serve you better and save you money. See him to-day.

Dry Batteries

Reduction Of Capital Ship Tonnage Of Leading Fleets Since Washington Conference

In view of the United States proposals for the further limitation of naval armament the admiralty "Return of Fleets" for 1927 has appeared at an opportune moment. The return shows how drastically the capital ship tonnage of the leading fleets has been reduced since the Washington Conference. On the outbreak of war, Great Britain alone had 42 dreadnoughts ready or under construction. Today the collective dreadnoughts of the seven principal navies barely exceed 60. Only eight battle cruisers are now in existence, and on ships of this type are building. So far as dreadnought construction is concerned, the "naval holiday" is already an accomplished fact.

Taking cruisers first, the British Empire is found to have 14 building, with nine more projected for the period ending with the fiscal year of 1929. If this program is carried out the Empire will have eventually 23 cruisers of the so-called "Treaty" class. The number of similar vessels now being built by the United States, Japan, France and Italy is 18 while 12 others are projected.

In capital ships the Empire has a numerical margin of two over the United States, though this is rather discounted by the superior armor and later design of many of the American units. The Empire has also a definite superiority in aircraft carrier. But in destroyers and submarines Britain is far below a one-power standard, and in spite of the current building program her relative strength in both type of craft continues to decline.

A very formidable mass of submarine tonnage is now afloat and on the stocks. The six leading powers have already built or laid down 285 submarines, while 69 additional boats are contemplated.

In the present return the Admiralty has released some interesting details of the new British warships that will soon be holding the pennant. Of these the most important are the two battleships, Nelson and Rodney, which have hitherto been veiled in mystery. They are the first battleships to have geared turbines designed for an output of 45,000 s.h.p., 23 knots. This is a very respectable speed for ships carrying such a ponderous weight of armor and guns. The battery of each vessel is now reduced to six 16-in. guns, 12 6-in., six 4.7-in. anti-aircraft pieces, and 28 smaller guns, with torpedo tubes. No other warships afloat will be able to develop such a tremendous volume of fire.

Pioneer Bee Keeping

Terrace District in British Columbia is Favorable Locality

W. S. Anderson, the pioneer bee keeper in the Terrace district, Central British Columbia, started into the industry three years ago with two hives. He now has twenty and last year had an average yield of 125 pounds per hive. He intends to make bee keeping the chief line on his farm and plans to have 100 hives. From early spring until late in the fall, there are flowering plants and trees that yield a good flow of nectar, and make the Terrace district a favorable locality for honey production.

American Settlers

Farmers from the Middle-Western United States are coming to Canada. In droves in the next two years, according to Mark E. Gibson of Omaha, Nebraska, who came to Winnipeg to secure a tract of twenty quarter sections of Canadian Pacific prairie land for himself and twenty families of friends and relatives from Nebraska, Iowa and Missouri.

Wheat for China

In spite of the troubles in China an increased demand from the Orient for Western Canada's wheat is being recorded. George McVior, Calgary, sales manager of the Wheat Pool, reports that heavy shipments are being made and that the indications are that these will be increased.

W. N. O. 1978

Canada Sliding Into Pacific

Every Year Ocean Encroaches Further Upon Western Coast: Line This Continent is slowly moving into the ocean. A few months ago a world-wide experiment lasting a month, was carried out to ascertain whether the Continental areas were undergoing a sort of sliding movement.

The experiment consisted of the concrete recognition and recording of Greenwich time signals sent out at prearranged times from a number of powerful wireless stations. These signals were received at observatories in more than a score of countries all over the world, and provided the material by which to test the longitude, or actual position, of each observatory with reference to the Greenwich meridian.

As a result of the comparison of the wireless longitudes just ascertained at Canadian stations, it is definitely stated that Canada, and probably the whole of North America, is slowly being carried westward into the Pacific, the amount of the movement averaging one meter—nearly 40 inches—annually.

Canadian Grown Seeds

Canadian-grown seeds command recognition in foreign markets by virtue of their inherent qualities of hardness and vigor of growth. It is a fact, of which Europeans have long been aware, that, in the Northern Hemisphere, the farther north any plant can be brought to perfection the higher will be the quality and that of near descendants.

Jabots Are Modish This Season

Smartly simple is this chic one-piece frock closing at the left side-front. View A has the shaped collar, cuffs on the long darted sleeves, and special jabots, of contrasting material. In View B the frock is fashioned of one material and the short sleeves are finished with shaped cuffs, while a trim belt fastens at the side with a buckle. No. 1569 is for misses and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3 1/2 yards 35-inch material, or 2 1/2 yards 54-inch. View A requires 3 1/2 yards 30-inch additional contrasting material (cut crosswise) for the collar, cuffs and jabots. Price 30 cents the pattern.

Our Fashion Book, illustrating the newest and most practical styles, will be of interest to every home dressmaker. Price of the book 10 cents the copy.

Motorists Will Welcome Latest Invention

Ontario Man Perfects Slot Machine For Sale of Gasoline

After experimentation and work extending over a period of some three years, S. J. Poncek and J. A. Richardson, of St. Mary's Ont., have perfected a gasoline vending machine, which, they believe, will revolutionize the entire present system of gasoline sale.

The new invention, for which patents have been secured in some countries and are pending in others, is a gasoline-vending machine on the "slot machine" basis, which will eliminate entirely the necessity of attendants at gasoline stations. They are operable at any time and in addition to the placing of coins in a slot for the amount of gasoline required, the consumer has but to push a button and the machine automatically pumps the gasoline purchased into the tank of the car.

In the operation of the machine, if gasoline is 20 cents per gallon, five sixths of a gallon is received for every quarter placed in the slot, and the indicator shows the amount received. Should the price of gasoline be 20 cents per gallon, the purchaser would receive a gallon and a quarter for his 25 cents, the full amount being shown on the indicator. The gas is supplied by the apparatus absolutely automatically.

The new machine is equipped electrically for operation where electrical power is available, and on a hand-operating basis for rural use. It is never closed, motorists being able to secure gasoline from the machine at any time of the day or night.

Special equipment makes the machine "fool-proof." Should anyone attempt to cheat the machine by placing a bogus coin or "slug" in the machine, the only reaction on the part of the invention would be the ringing of a loud bell and the lighting of a red light to notify the police or anyone in the vicinity of the attempt. No gas could be secured unless true coin of the realm is used.

Released at the end of August, 1926, at Hyde Park, London, a toy balloon came down near St. Paul's Cathedral 117 days later.

You may not get all that is coming to you in this world—but look out for the next.

Blind Boy Musician Radio Star

Ronald — otherwise "Ronnie" — Matthews, blind from birth and possessing a natural talent for music which has been carefully nurtured, has become a welcome performer at special broadcasts over C.N.R.V., the Vancouver, B.C., radio station of the Canadian National Railways. "Ronnie" chose the piano as his instrument of expression and the foundation of instruction has been so carefully prepared that he has already successfully passed two examinations under the auspices of the London Academy of Music.

Seeking for a medium to adequately present the boy's talent to the world at large, G. A. Wright, broadcasting manager, evolved a feature known as "The radio train," by which an imaginary train leaves C.N.R.V. and visits homes of kiddies in British Columbia, the neighboring provinces, Yukon, Alaska and the Pacific States. Of this "train" Master "Ronnie" is "conductor," acting as announcer and occasionally offering pianoforte selections. The feature has proven so successful that it has been made a permanent part of this season's programmes at C.N.R.V.

The photographs show the "train" crew ready for the broadcast. From

Natural Resources Of The Western Provinces Are Rich Beyond The Dreams Of Avarice

Chosen Varieties of Vegetables

Necessary to Select Best Available Seeds to Ensure Good Crops

Experienced growers of garden crops have learned that there are great differences in varieties of vegetables as well as corn, melons, pumpkins, peas, tomatoes, and other crops that are grown either for home use or for the market. The names of varieties as published in seed catalogues have not always been a safe guide to the grower. An analysis of Canadian seed catalogues made by the seed branch of the Department of Agriculture, and the Canadian Seed Growers' Association, revealed no less than 2,425 variety names advertised from year to year. Many of these were found on test to be duplicates of the same variety and in other cases they were so inferior as to be unworthy of a place in the garden. For the guidance of the growers of these crops the best varieties, as proven by tests of various kinds, have been selected out and reduced to 266 in number.

The selected list has been published as a supplement to the regulations under the Seeds Act, issued as Acts, Orders and Regulations No. 11 of the Department of Agriculture at Ottawa. The list is arranged alphabetically, commencing with the artichoke, of which two varieties are named, followed by asparagus, with three varieties, beans, with twenty-five articles, and ending with vegetable marrow, with four varieties, covering in all forty-four kinds of garden crops. The varieties given are arranged according to earliness of maturity, and those of outstanding merit are indicated by the letter "X." This supplement, just off the press, is being distributed by the publications branch, Department of Agriculture, Ottawa. To the extent that it is followed will gardeners reap satisfaction in realizing that they are growing the best available sorts of the different crops.

A little quick time placed where ants frequent will drive them away.

A great deal has been heard in recent years as to the natural resources of the prairie provinces, but few people are aware of how tremendous and varied these resources are. According to the Natural Resources Intelligence Service of the Department of the Interior at Ottawa, the raw materials available in that region between the Great Lakes and the Rocky Mountains embrace almost everything for which Canada is noted and in quantities that leave no doubt as to future development.

The wheat lands of Canada's so-called prairie provinces are vast, but the forested areas are greater. It may surprise many people to learn that Alberta has much standing timber as Ontario, or that Saskatchewan has greater timber supplies than all the maritime provinces combined. While much of the timber is too remote from transportation to be immediately available, it is of considerable significance for the future and the figures are interesting.

The possibilities for future mineral development are likewise phenomenal. The coal reserves of Alberta and Saskatchewan constitute some of the outstanding deposits in the known world while bluish sand, natural gas and oil form vast areas. Three-fifths of Manitoba is geologically identical with the mineralized areas of Ontario and Northern Saskatchewan and already striking deposits of copper, gold and other minerals have been located and are now being developed. Saskatchewan also possesses an abundance of fire clay, earthenware and brick clays and sodium sulphate beds, while Manitoba has important building stone and gypsum.

The coal reserves in southern Alberta and Saskatchewan form a permanent guarantee of power for future commercial developments while in the Rockies, in Eastern Manitoba and in all of the northern provinces, the tremendous resources in natural water powers are awaiting development. The commercial possibilities of the known rivers in the three provinces are about eight million horse power. Manitoba having almost six millions and the other two over a million each.

The fame of this country for its game and fur-bearing is too well known through history of the Hudson Bay and other trading companies to require explanation. The yield of furs continues apparently unabated and with the establishment of fur farms it would appear as if this great source of revenue would be a permanent one.

Other national resources which might be mentioned are the bracing healthful climate, the vast navigable waterways and the magnificent scenery which varies from the seas of golden sand to snow-capped mountain ranges and from forested valleys to Arctic pastures.

Permanent Timber Supply

Three-eighths of Land Area of Canada is Suitable Only for Trees

It is estimated by the Forest Service of the Department of the Interior that the only economic use for three-eighths of the land area of Canada lies in the growing of trees. This vast area of territory, while incapable of successful agricultural production is, if permanently dedicated, protected, and managed, suited to the production of a timber crop which would guarantee for all time the supply of raw material for Canada's wood-using industries.

Pea Canning Factory

Something new in exhibitions has been "sprung" by McGrath, Alberta, namely a "Pea Exhibition" — a preliminary to the establishment of a pea canning factory. The show will be held in connection with the McGrath Exhibition and Old Boys' Home Coming, set for August 4th and 5th.

Customer: "This overcoat's too short."

Clerk: "It's all right—it comes just above the knee."

Customer: "Who do you think I am? A woman?"

WORLD HAPPENINGS BRIEFLY TOLD

Two fine autographed engravings of the King and Queen will occupy a place of honor in the new Canadian legation.

El Salto observatory, near San Diego, announces the appearance of a comet in Southern Chile have become active.

A Royal Air Force bombing aeroplane crashed at East Church, Kent, Eng., and its four occupants were burned to death.

Quebec provincial general elections will be held Monday, May 16. Nomination will take place May 9. These dates were announced following a meeting of the cabinet.

A fossil of unusual interest has been found in the workings of No. 2 mine at Glace Bay, Nova Scotia. The petrified form had the appearance of a crocodile or alligator about two feet long and was discovered embedded in the submarine area about two miles under the Atlantic.

For Aches, Pains, The Safe Home Remedy NERVILINE

When sudden sickness comes, when the kiddies come in with colds, their little chests and throats sore from coughing, quick results always follow, a vigorous rubbing with good old NERVILINE. If it's Croup, Colds, Diarrhoea, NERVILINE is a wonderful friend. It brings ease and comfort so quickly. For young and old, to overcome the minor ills that constantly arise in the home, nothing compares with "Nerviline."—35 cents at all dealers.

Jupiter, measuring 86,500 miles in diameter, is the largest planet; Mercury, 3,030 miles in diameter, is the smallest.

Is More Than Pleased With Results He Got

Manitoba Man Speaks Highly of Dodd's Kidney Pills

Mr. W. G. Kemble Used Dodd's Kidney Pills for Weak Kidneys and Found Them Very Beneficial. Minnedosa, Man. (Special)—The following is one of the many letters of praise which are so continually receiving. It comes from Mr. W. G. Kemble, of Waters Street. He writes: "Getting up in the morning I used to have bad pains in my kidneys. I was told to try Dodd's Kidney Pills and must say I have to thank the person many times for telling me about Dodd's Kidney Pills for they brought me great relief. I would not be without them."

That Mr. Kemble's trouble came from the kidneys was evident from the relief he got from Dodd's Kidney Pills. When the kidneys become clogged or out of the normal line, it becomes sluggish, the impurities are not strained out of the blood and the result is weakness and lack of energy all over the body. This condition is not only disagreeable but dangerous as well. The impurities in the blood are the seeds of disease. Guard against these diseases and get back your accustomed energy by using Dodd's Kidney Pills.

One of New York's newest skyscrapers burns enough coal in a day to heat four average sized homes all winter.

Was So Nervous The Least Noise Made Her Jump

Mrs. W. H. Yates, Ashern, Man., writes: "I was bothered very much with my heart and nerves, and the least noise would make me jump and almost stop my heart beating. I told my mother about it one day, and she said that she had been bothered the same way and told me to get a box of

White Star Liner "Albertic" 19,000 Tons, Largest Ever to Sail From Montreal

Another page in steamship history will be written this season when the Albertic, of the White Star Line Canadian Service (shown above) docks at Montreal at the end of April, as this will be the largest steamer yet to sail up the river St. Lawrence as far as Montreal.

Previous to this season the Doric and Regina, sister ships in the White Star Line Canadian Service, held the record for being the largest steamers to enter the port of Montreal. They are 16,500 tons each, but the Albertic is 19,000 tons and, therefore, 2,500 larger than the Doric and Regina. The Albertic is an R.M.S. steamer. She was formerly known as the Ohio, one of the world famous "O.C." liners. She will join the St. Lawrence fleet with a reputation equal to her size and, in addition to being the biggest steamer ever to sail up the St. Lawrence to Montreal, will be one of the most luxuriant to make Montreal her terminal.

The Albertic will be used on the direct service to Liverpool eastbound while on the westbound route she will call at Queenstown. She will leave Liverpool on her first westbound voyage under the new name on April 22 and will steam out of Montreal on her first eastbound voyage on May 7.

Built in 1923, the Albertic is 587 feet long, 72 feet wide and 37.6 feet deep and she has seven decks. "A" is the observation deck; "B" is the boat deck on which are forested the smoking room, the lounge, the read-

ing room and a few staterooms. "C" is known as the promenade deck. This is partially glass enclosed and it offers the incentive to exercise, which, in turn develops the healthy appetite.

On "C" deck top are the luxurious suites comprising bedroom, with separate bath, sitting room and bath-room while on "D" deck are a few more suites, and staterooms together with the dining room, the haven of refuge after big appetites have been created on deck in the tangy sea air.

There are three other decks, "E," "F" and "G" which are used for staterooms where passengers can be assured of a restful sleep after the activities of the day on the sunning decks.

The equipment of the Albertic embodies the latest designs in wireless telegraph and submarine signalling apparatus, fireproof and watertight bulkheads, combining sump and alarm signalling appliances, while among other features there are on board for the convenience of passengers, two barber shops, a ladies hair-dressing parlor, and a library.

The Albertic will make eight voyages from Montreal this season, on May 7, June 3, July 2, July 30, August 27, September 24, October 22, and November 19, and on all these voyages she will carry cabin, tourist, third cabin and third class passengers direct to Liverpool. On her last trip of the season she will call, on route, at Glasgow.

Claims Television

Has Spanned Ocean

New York-London Demonstration Promised by British Inventor. John L. Baird, young British inventor, claims to have established television between London and New York. He proposes to give a wireless telephone-television demonstration between London and a New York store shortly. A special receiving set has been built for the purpose.

Mr. Baird said that for several weeks he carried on his experiments between his station at Coulsdon and a station twenty-five miles outside New York. A new station is being installed in America by means of which Mr. Baird says it will be possible to demonstrate the practicability of his invention. If these tests are successful, Television, Limited, the company of which he is technical director, will place a Television receiving set on the market at a cost of \$150.

Widespread interest was aroused in London by the successful television experiments between New York and Washington. Although many experiments in television have been made in Britain, engineers of the General Post Office are not co-operating with the scientists on both sides of the Atlantic who are trying to bring this new development within reach of the public. A post office official, questioned on the subject, replied, "There is much to be done before the post office aims at a public service of 'television'."

The Changing West

Senator W. A. Buchanan, publisher of the Leithridge Herald, addressed the Toronto Young Men's Board of Trade recently on "The Changing West," pointing out the transformation in progress from straight grain growing to mixed farming with industrial centres developing, all tending to broaden the economic and labor basis of the West.

The development of radio in Sweden now covers the entire country. More than 200,000 receiving sets are in use.

Canadian Air Force

Four Modern Fighting Planes to Replace Obsolete Aircraft

Replacement of a few obsolete war type aircraft by a flight of four modern fighting planes to familiarize officers of the Canadian air force in the handling of modern planes is provided for in the estimates passed recently by Parliament, according to the Department of National Defence. The air service estimates passed by the House totalled \$3,892,293. Of this \$1,669,694 was for military training and operation and \$2,222,599 for civil government operations and civil aviation.

Besides providing for the new planes, the former estimates will enable the training on a small scale of a reserve of officers and air staff. The estimates covering civil aviation consist mostly of forest and survey services for other government departments.

The program includes this year air patrols for fire detection and suppression of over 70,000,000 acres of forested lands in Eastern and Northern Manitoba and Northern Saskatchewan, and for fire detection patrols of over 3,500,000 acres in the forest reserves in the foothills of the Rocky Mountains in Western Alberta.

The air survey program includes work in every province in the Dominion. The growing importance of this feature of aviation has been recognized and the development of the resources of the north country are largely dependent on good maps being made available of remote districts now becoming of great importance through their mineral or forest wealth.

If you want a man to praise your judgment all you have to do is agree with him.

WHITE STAR LINE CANADIAN SERVICE

IS NOT POSSIBLE NOW TO EQUALIZE FREIGHT RATES

Ottawa.—After sittings extending over two years and occupying 105 days, the general freight rates inquiry by the House of Commons, conducted by the House of Commons, is drawing to a close. The inquiry is expected to be completed this week.

James Pihlblad, K.C., the last counsel to be heard for the provinces or others opposing rates increases, concluded his address with W. N. Tilley, K.C., Toronto, at once opened the case for the railways. He remarked on the changes which had occurred since the first important argument on freight rates was before the board, in 1911. Important changes had occurred in transportation conditions. In those days there was only one trans-continental railway spanning Canada. So, too, the scope of this inquiry was far more sweeping and comprehensive than any previous investigation had been and the judgment of the board, when rendered, would be of the greatest importance to all concerned—to the railway, the provinces and the nation as a whole.

Mr. Pihlblad dealt at some length with the matter of equalization. He declared equalization of rates was an impossibility today. Any attempt to adjust the present rates structures today on the principle of an equal rate for equal mileage in every part of the country would mean chaos and disaster to the commerce of the country.

It was far more necessary, he declared, to set about an adjustment which would enable the natural resources of the country, the fruit, lumber, canning products, fish, etc., to move from the point of production to the most profitable market, and so facilitate the development of that market, both domestic and foreign, than it was to legislate so that the trader in Montreal could serve his local market, at say 150 miles radius, at the same cost of transportation as the trader in Winnipeg could serve his.

Equalization of rates, said Mr. Pihlblad, was no new idea. An attempt had been made in 1872 to put equalization legislation through the Canadian Parliament but without success and a similar attempt in the Imperial Parliament the previous year had met a like fate. Today it was no more practicable than it was half a century ago.

Russian Trade

Improvement in Agriculture and Industries is Reported

Montreal.—A big British concern engaged in shipbuilding has approached the chief concession committee of the Union of Soviet Socialist Republics offering \$100,000,000 long term credits to build merchant ships for the Soviet, according to announcement made here by the trade delegation of the Union. The offer, it was stated, was now under consideration.

During the four months of the current fiscal year beginning October, 1925, export trade of the U.S.S.R. reached \$135,541,000, leaving a favorable trade balance of nearly \$18,000,000. Trading was carried on principally with eastern countries. The Soviet representative stated the population of Russia was now 141,805,000 and statistics showed a general improvement in agriculture and industries since the 1921 period of depression.

Arctic Flier is Safe

New York.—The North American Newspaper Alliance has been informed that Lieut. George H. Wilkins, Arctic flier, who has been missing since March 23, when he hopped out from Point Barrow, Alaska, for the unexplored regions to the north, has made a safe return to Beechy point.

Negro's Skin Turns White

Glasgow, Ky.—Eugene Clark, negro, whose skin began to change color a few years ago, is dead at his home near Sulphur Well. At the time of his death Clark's skin had virtually been transformed from black to white.

W. N. U. 1678

Well Known Horseman Killed

Captain Liddington, Victim of Horse-payne Wreck, Was Bringing Shipment of Horses West

Ottawa.—Captain J. Liddington, who was killed in the train wreck at Homepays, was an internationally known horseman. His father, Major Liddington, and himself were conducting a shipment of thoroughbreds from England and had been in Ottawa for several days where some of the horses were displayed. Major Liddington took ill while here and died in the civil hospital.

The son, on Easter Monday, proceeded, assisted by helpers Garnett Bull, H. Enderby, and Patrick Brock, all believed to have come from Thame, England, to load the remainder of the horses some 25, which were being taken to Winnipeg and Vancouver where they were to be sold.

Six of the horses in the shipment were sold while the party was here to Captain Jenkins, of Toronto. Joseph Gibson, of Ottawa, bought one, and eight were sold in New York. All the remainder of the shipment, except two, it is believed, were killed in the wreck.

The horses were believed to have all won races in the old country and was a valuable collection. Major Liddington and his son had planned on returning to England for another shipment in August.

Government Refuses To Act

Peking Officials Reject Soviet Demands in Connection With Raid

Paris.—Rejection by the Peking Government of the demands of the Russian, Soviet Government in connection with the raid on the Soviet buildings in the embassy compound at Peking, is reported in a despatch to the Indo-Pacific Agency. The raid on orders of the Northern Chinese authorities was carried out on April 6.

Two days after the raid the Soviet Government ordered all the embassy officials to leave and in a note delivered to the Chinese charge d'affaires at Moscow, made a series of demands. These included immediate evacuation of police from the compound, the release of all those arrested in the raid, and the return of all documents seized, together with all money, personal property, household goods and books taken by the police.

British Peer Joins Laborites

Sir Robert Peel Has Gone Over to Labor Party

London.—Another member of the British nobility is to join the Labor Party. Sir Robert Peel, the younger grandson of the statesman, "Bobbie" Peel, from whom the London police-men derived the nickname which has clung to them since early in the Victorian period, has announced his intention of participating in politics on the side of Labor. The young peer already has under consideration proposals to stand for Parliament in the Tamworth division of South Staffordshire, his home, which was the division represented by his grand father when he entered politics.

While prime minister, the older Peel founded the modern police force, and immediately the police men became known as "Bobbies," and also as "Peelers," but the latter designation lasted only for a short time.

Federalship Seizure Illegal

Judge Hands Down Decision in California Court

San Francisco Cal.—Handing down a decision that the seizure last March of the steamship Federalship with its million-dollar cargo of liquor and arrest of the captain and 19 members of the crew, 300 miles off the California coast, was illegal, Federal Judge Bourquin ruled, that the seizure was in violation of treaty relationships between nations.

Captain S. S. Stone, skipper of the Federalship, and 19 members of his crew, were released from jail following the judgment.

Supports New Voting Bill

London.—Lloyd George has promised his support to the Government's measure giving women of 21 years of age the franchise. The measure is to be introduced in the House of Commons shortly.

FORMER LABOR PRIME MINISTER AT WASHINGTON

Washington.—A sentimental traveler down old familiar roads was how right Hon. J. Ramsay MacDonald, former Labor Prime Minister of Great Britain, described himself to the Canadian Press correspondent here, when he arrived for a brief visit to Sir Edme Howard, the British ambassador.

Mr. MacDonald stated that his visit had no political significance. He said he was unable to reach Canada on this trip as pressure of business compelled him to sail for home very soon.

Asked if British Labor had recently resented the deportation law of 1912 in Canada, Mr. MacDonald said he had never been seriously alarmed that the sedition laws of the Dominion would be unfairly used against laborers there.

In the opinion of the former Prime Minister, the Baldwin Government had "rumbled," and the trend of political opinion was in favor of the return to a Labor Government in Great Britain on his analysis of the vote in recent by-elections in Leith and Southdown.

Mr. MacDonald predicted a recurrence of the coal miners' strike unless wrongs of the miners were redressed soon. He did not believe, however, that the general strike weapon would be used next time, remarking that many who favored the general strike weapon had found themselves unwilling to be "generally struck."

Mr. MacDonald was a luncheon guest at the British embassy and was entertained at dinner by the executive council of the American Federation of Labor.

Another Royal Exhibit

Belgian Queen Announces Entry for Poultry Congress

Ottawa.—Still another member of a European royal family is to be an exhibitor at the world's poultry congress to be held in Ottawa from July 27 to August 4. Congress headquarters received word from Brussels that included in the Belgian national live bird exhibit would be a number of fowl the property of Her Majesty Queen Elizabeth of Belgium. The Belgian exhibit will consist of fowl, pigeons and rabbits.

Other royal exhibitors already announced are His Majesty King George, R.I.II, the Prince of Wales and R.I.II, the Prince of the Asturias, heir to the Spanish throne.

New Fashions from Japan

Those young ladies who are travelling on the world cruise of the Canadian Pacific flagship the Empress of Scotland, were so struck by the beautiful garments they saw when their tour came round to Japan that they went and purchased one of the most outstanding, namely, the haori. This, as can be seen from the engraving, is a very beautiful sort of shawl whose folds can be arranged according to taste in almost any shape desired. They were very attractively designed in floral designs and from the general appearance of them, it would not be surprising if these young ladies became the advance guard of a new fashion originating from Japan. Anyway, we make a present of the idea (although not of the garment) to our readers.

Not Getting Fair Deal

Rural Schools Entitled to Experienced Teachers Opinion of Dr. Kerby

Edmonton.—"Rural school children are not getting a fair deal today," declared Dr. George W. Kerby, principal of Mount Royal College, Calgary, in an address before the convention of the Alberta Educational Association here. He deplored the tendency to train teachers for handling city schools, the sending of junior and often immature teachers to country schools to gain experience and a lack of sympathy for rural schools.

"The average rural school trustee looks at the country school as a little building where a little teacher teaches little things to little children for a little while at a little salary," declared Dr. Kerby. "There is need to consider the whole question of rural education, which is greater than the wheat pool or immigration problems."

Canada's Jubilee

Sir Arthur Curry Would Like to See Preparations Hurried Up

Montreal.—The apathy with which, he said, Canadians were approaching the jubilee date of Confederation was deplored by Sir Arthur Curry, commander-in-chief of the Canadian troops during the war and principal of McGill University. He spoke before the Electrical Club of Montreal.

"Jubilee committees have been appointed," said Sir Arthur, "but I would like to see some sign of activity upon the part of those forming those committees. The birthday of Confederation is not far off. It is high time something were done. I know that on the first of July those great bells at Ottawa will peal out but they will not reach the general public of Canada."

Hopes to Retain MacBrien's Services

Ottawa.—The hope that the services of Major-General J. H. MacBrien, chief of staff of the Department of National Defence, might be retained was expressed by Premier King, addressing the officers of the Governor-General's Foot Guards at a dinner. General MacBrien some time ago tendered his resignation. Premier King paid high tribute to General MacBrien.

Expects to Win Wager

Toronto.—W. H. Chapman, aged 77, who has walked nearly 10,000 miles since July 1923, to win, he says, a \$5,000 wager, passed through this city April 19. He has yet to cross the continent to comply with the rules of the wager. He started from Milwaukee and is now going to Godhavn, and expected to be in Vancouver and complete the round trip some time in the summer.

CIVILIAN WAR SUFFERERS MUST WAIT FOR A YEAR

Ottawa.—There will be no payments this year to the civilian sufferers from the great war.

Reparations Commissioner Friel has not yet completed his work.

It is understood that the secretary of state has been for some time pressing Mr. Friel to hurry his reports, seven being still unfinished, but has been unable to speed things up. The result is that many impoverished citizens of Canada must suffer for another year without the compensation payments which the Dominion is willing to pay.

These war sufferers have no legal claim, but the principle has been generally accepted that compassionate payments will be made out of Canada's share of the reparations under the Dawes plan.

There is no legislation authorizing this and whatever payment is made must be specifically voted by parliament. An attempt was made two years ago to get parliament to vote part of the money, but this was refused. Parliament wanted the full report.

With parliament prorogued and the commissioner's final report missing, there was no vote passed. The secretary of state admits that some of the claimants are in a destitute condition, yet nothing can be done for them.

Canada has received \$1,000,517 in payments on reparation account, and still has \$2,789,420 due from Great Britain. The latter sum, however, is dependent on the settlement of other accounts between Britain and Canada. If this sum is paid there will be \$7,798,947 available on reparations account, together with any Dawes instalments paid in the meantime.

The policy of the government with reference to this money will not be decided until Commissioner Friel makes his report.

The British parliament appropriated \$27,500,000 for distribution to claimants who have suffered loss. Canadians domiciled in Britain have thus been compensated, but Canadians domiciled at home must wait nearly nine years after the war is over.

Announces Anaemia Cure

Ready For Public Use Very Soon Says Rochester Doctor

Rochester, N.Y.—Mr. H. H. proclaimed a new victory over disease with his discovery of a remedy that within a few weeks there will be ready for public use a cure for anaemia that has been successful in 90 out of 109 cases.

The announcement was made by Dr. George R. Whipple, dean of the medical schools of the University of Rochester, after ten years of experiments in which he has been assisted by Mrs. Frieda S. Robbins, physiologist at the school. For the past few years Dr. George R. Whipple and Dr. Edwin J. Cobb, of Harvard medical school, have collaborated with them.

The cure is a serum discovered during a decade of experimenting on anemic dogs and humans. It is an extract of beef liver but has not yet been sufficiently purified to make chemical identification or naming possible. It will be distributed through selected physicians in the various cities as was done with insulin.

Only Two Dry Provinces

Government Liquor Control Goes Effect in New Brunswick

Fredricton, N.B.—The province of New Brunswick, formerly associated itself with the other six provinces of Canada which now have Government control liquor laws when Lieutenant-Governor Todd gave Royal assent to the measure which passed the Legislature and which gives this province an act similar in many respects to that which will shortly come into operation in Ontario.

This leaves only Nova Scotia and Prince Edward Island with temperance laws based on prohibition of the sale of alcohol.

Banff's Big Indian Pow Wow a Colorful Spectacle

The Stony Indians, who live near Banff, Alberta, in the Canadian Rockies, believe in the old adage: "All work and no play makes Chief Jack a dull boy," or words to that effect. Consequently, when they leave their Morley Reserve in July for their annual Pow Wow at Banff, they put on for two or three days one of the most colorful and unique spectacles seen in North America. Headed by such noted chiefs as Moon-killer, otherwise Peter Wesley, who still is Queen Victoria's trusty flag; Hornfoot, Hector Crawler, medicine man; Walking Buffalo, Johnnie "arspaw, David Bearsapaw, Green "ile and Spotted Eagle, they parade in the morning through the streets of Banff and to the courtyard of the Banff Springs Hotel, resplendent in gorgeous trappings of head-work, rumble tails and eagle feathers. The "juas and bucks have on more war

paint than a Broadway flapper, and even the horses are painted.
"They paposes are carried in moss bags on their mother's backs, or on the old travoies, and their little, shining faces seem to reflect the happiness of all these "people of the woods" in being back again in the mountains which they loved to roam. These Indians are thrifty. Some of them have ranches in the foothills of the Canadian Rockies; they cut and export wood; the squaws do beautiful bead-work, which they sell; the trap-lines yield valuable furs; and, on the whole, the Stonys are the most capable and business-like of the Western Canadian Indians.

Tribal sports, bow and arrow contests, pony races, tepee pitching in the shortest time, squaw races, wrestling on horseback by bucks, horse racing contests by young Indians and many other events, equally interesting, are staged daily in the Elk Pasture near Buffalo Park, in a lovely meadow surrounded by mile-high mountains. The tepees are pitched along the sides of a vast rectangle and many are painted in fantastic designs, lending a dash of color to the scene. Meals are cooked in the open, squaws carry wood and water while little children romp and play around the tepees. In the evenings, the Indians dance in a circle to the music of tom-toms and sing the weird songs which their ancestors have sung for centuries on the shores of nearby Lake Minnawanka, the "Spirit Water" of the Stonys.

Here and There

From the year 1919 to 1925 there was an increase of \$1,303,772.896 in the total taxable value of realty in Canada, according to the Dominion Bureau of Statistics. The value in the latter year was \$7,331,785,335.

The maple syrup production of the Province of Quebec will be in the neighborhood of 20,000,000 gallons, it has been officially estimated, this being an average output. The season has been much more advanced than in former years.

The pulp newsprint mill of the New Brunswick International Paper Co., Ltd., will be erected in Dalhousie, it is understood, as it is said that sales-factory arrangements resulted at the conference between representatives of the company and the town council.

A school will be established at the Vancouver Shops of the Canadian Pacific Railway for the purpose of instructing the apprentices in mathematics and drawing. It was announced recently by A. Sturrock, assistant superintendent of motive power, western lines.

"Merry Sunshine," an eight year old poll cow, bred and owned by Galloway Brothers, of Kamloops, has recently completed a 365-day R.O.P. test and established a new Canadian record with 13,517 pounds of milk. This record was made under ordinary farm conditions on a ranch nearly 4,000 above sea level, the cow staying out of doors day and night.

A cable from London, England, reads: "Following the perfection of a method for the production of artificial wool from pine needles by Italian and German scientists, a British financial and industrial corporation is in touch with Quebec Provincial Agents Office at Quebec city investigating the possibility of establishing such an industry in Quebec Province.

A great future for tobacco growing in Western Ontario is predicted by the Hon. J. E. Martin, Provincial Minister of Agriculture, who states that counties engaged in this industry have demonstrated that they can grow as fine tobacco leaf as Kentucky or Virginia. A number of experts have been engaged, he announced, to visit new growers and give them all information possible.

Supervising 200 Norwegian settlers, including wives and children, from the districts of Notodden, Heddal and Valdres sections of Norway, Eric Flatbo, chief clerk in the Canadian Pacific Railway office at Bergen, saw the settlers off for Winnipeg from the Windsor Station, Montreal, fifty of the party were going straight to relatives. Mr. Flatbo estimates that some 600 persons from the districts named will eventually come to Western Canada.

Via Canadian Pacific Railway recently there was forwarded to His Holiness the Pope an album of photographs of the Canadian Rockies offered by E. W. Beatty, Chairman and President of the system, following the suggestion made by a prominent Canadian citizen who had described the Canadian Rockies to His Holiness in an interview some time ago. A wish for a book showing views of the mountains was expressed by the Pope whose wish was conveyed to Mr. Beatty. The album is beautifully bound in white kid.

Canadian limonite ores will soon be used in the manufacture of a new pigment called "Titanium White" (to be used in the same way as white lead) according to R. H. Monk, of Montreal, who states that plans are nearing completion for the erection of a plant in Montreal, and, if everything develops as expected, this plant will be set up in the autumn. The development branch of the Department of Colonization and Development, Canadian Pacific Railway, has been active in furthering the establishment of this industry.

CANADIAN NATIONAL EUROPEAN TOURS.

A maximum of travel through particularly interesting countries at a minimum of expense is provided in the Canadian National Educational tours this summer thru Scotland, England, France, Belgium, Switzerland and Italy.

Two tours have been arranged and sailing will be made from Montreal, July 8, on the S.S. "Andania," direct to Glasgow. Very careful attention has been given to the itineraries involved.

Tour No. 1 is a 37 day trip on sea and land, visiting important cities in Scotland, England, Belgium, France, Switzerland. All expenses, \$372.50, Montreal to Great Britain and the Continent and return to Montreal.

There will be low excursion fares to the seaboard from points in the Prairie Provinces.

These tours will be personally conducted from Western Canada, and while overseas will be under the direct care and supervision of thoroughly responsible and reliable organization, fully qualified in every particular to successfully look after the interests of our patrons.

The sight seeing program is very complete and generous. Motor coaches and automobiles are freely used. All sight seeing is well planned to save unnecessary fatigue and to see the worth while places within the time at our disposal. Competent lecturers will reveal to our patrons the outstanding features, literary, historic, artistic or scenic of the Old World centres visited. J. W. McCulla, phone 23, local agent for the Canadian National Railways, will be glad to discuss these tours and arrange all details.

NEW WHEAT POOL CONTRACTS.

The Alberta Wheat Pool has not issued any new contracts. A report that these new contracts had been issued is erroneous. Members of the Wheat Pool will receive these in due course, but in the meantime are advised not to pay any attention to rumors regarding this matter. The new contracts will be for a period of five years from the date of the expiration of the present contract. Present members will not be charged any fee for signing the new contracts if signed before August 1928

Stony Plain and District.

Farmers bringing in hogs should have these at the stock yards by 1 p.m. Thursday, as the train is leaving much earlier at present.

Beginning in next week's Sun, the soul-stirring serial story "Why Girls Leave Home," a story of a small town. Don't miss the first chapter.

Several cottagers have already taken up their residence at Edmontoon Beach.

Services will be held in St. Oswald's church, Stony Plain, on Sunday next, May 1, under the auspices of the Baptist Church. Service at 7:30 p.m., in English and German, by Rev W. Henke. Selections will be given by the band and choir.

Mr A Meredith made another shipment of cattle this week, and is preparing for further large shipments every week.

A dance is billed to be held at Blueberry schoolhouse on Friday evening, May 6.

Mr and Mrs J Kennedy and family, Edmontoon, have rented a cottage at Edmontoon Beach from Mr Barrie, and are now occupying Island View cottage.

The Muir Lake Sporting Club held a meeting Friday night last, at the home of Mr Gamble. It was decided to hold a dance tomorrow night (Friday) the 29th.

Get your application for 1927 motor license at The Sun Office.

Wheat Pool Pacific Terminals

The Alberta wheat pool has loaded twenty-two ships with wheat from the 1926 crop at Prince Rupert and expects to bring the total up to twenty-four before the crop movement is ended this spring.

The Alberta pool terminal at Prince Rupert has already handled over five million bu., and the total will reach 5,788,000 bu. within a few weeks. This is a larger total than was anticipated last fall.

The Prince Rupert house was built and is owned by Canadian Government, has a capacity of a million and a quarter bushels, and is probably the fastest handling terminal on the Coast. It is under lease to the Alberta Pool for a term of two years. Jos. Bennett is superintendent of this elevator. Then the Pool's extensive operations, the ocean freight differential has disappeared, and grain is shipped to Europe from Prince Rupert at the same rate as from Vancouver.

Mr. Golz Leaves.

Mr Erwin H Golz left yesterday for his home in Chicago. Since coming to Stony some three years ago, to take charge of St. Matthew school No. 1, Mr Golz has been a popular teacher and a general favorite in the community.

His activities embraced a general leadership in the Stony Plain branch of the Walther League, the best interests of whose members he had always at heart. He organized the athletic section of this society along new lines, and had the satisfaction of knowing his efforts were appreciated. He leaves accompanied by the best wishes of all with whom he came in contact, and will be greatly missed by those young people of the Lutheran persuasion with whom he had been so closely allied since coming here.

Spud Market Has Slumped.

The potato market slumped again last week, and jobbers are quoting only \$19 a ton on stocks delivered. The Market Examiner says the cause of the decline is that many growers are getting "cold feet" and are preparing to dump their offerings on the market before it is too late. A while back when the market was holding at steady levels and receipts were light, and everyone looking for the demand for seed stocks to start with a rush, growers held off and waited for prices to go up. The seed demand not developing when expected has created a sort of panic with the result that growers will sell while it is possible to obtain a fair price.

Railway Time Table.

A change in the running time of the trains on this division of Canadian National Ry. will take place Sunday next, May 1st. Following is the new schedule:

Going east—Monday, Wednesday, Friday at 6:27 a.m. Sunday, Tuesday, Thurs., Sat. at 5:43 a.m. Going West—Sunday, Tuesday & Friday afternoon at 1:30. Every morning at 2:47.

No change will take place at present, in the running time of the Prince Rupert train.

Stony Plain and District.

Mr Jac Enders, the well-known sport, is leaving this week for Chicago.

Saturday next, April 30th, is the last day you may hunt or kill muskrats in this district.

Mr Jac Miller left this week on a three-weeks' visit to Banff, to recuperate.

On Wednesday, April 20, to the wife of Mrs Valentine Gabel, a daughter.

A wedding is being celebrated today (Thursday) April 28, at the residence of Mr and Mrs Geo Ducheolke, south of town, when their daughter Florentina is being united in marriage to Mr Rudolf Gabel, son of Mr and Mrs Peter Gabel of Spruce Grove. Rev E. Eberhardt, pastor of St. Matthew's Lutheran church (Missouri Synod) is officiating. The happy couple will reside at Edson, where the bridegroom holds a position with the Canadian National Ry.

With the curling season a thing of the past, the bridge season officially ended, and the ground not in shape for work in the garden, this should be a good time to rest up in readiness for the summer holidays, says the Leduc Representative.

M. M. Mecklenburg, the well known optical specialist, will be at the Royal Hotel, Stony Plain, on Monday, May 30th. See him and see well.

The case of Mrs Edith Clara McLeod against Spruce Grove M.D. for injuries received as the result of a fall on a defective sidewalk in the hamlet, was concluded last week before Judge Boyle. The lady sued for \$1000 and was awarded \$500.00. P. G. Thomson was her counsel.

Mr J A Barrie has received instructions from the P. O. Inspector to re-open the post-office at Edmontoon Beach on May 1st.
